(54) Title: METHOD AND SYSTEM FOR SCREENING AND INDICATING INDIVIDUALS WITH HIDDEN INTENT

(57) Abstract: A system for screening and indicating individuals with hidden intent that includes: a working place for fulfillment of a stated assignment. The system further includes a stimuli exposure block for exposure of a stimuli to the working place. The system further includes sensors and measuring tools block for registration of individual's psycho-physiological characteristics giving rise to registered parameters. The system further includes databases block for storing of data related to screening and indication setup and execution. The databases block includes; tools and sensors database including data about a stimuli exposure tool and a sensor and measuring tools; a stimuli database including a stimulus. An exposure procedures database includes an exposure scenario and psycho-physiological characteristics to be registered. An evaluation procedures database including a test criterion and a predefined discrepancy for the exposure scenario as well a rule for evaluation of discrepancy between the registered parameters and test criterion. A processing block for processing and management of data stored in the database block.
